

Lasting Impressions Creator - Quick Start Guide

Eight easy steps to create your own beautiful custom labels

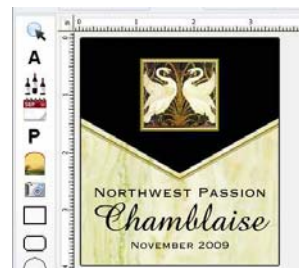

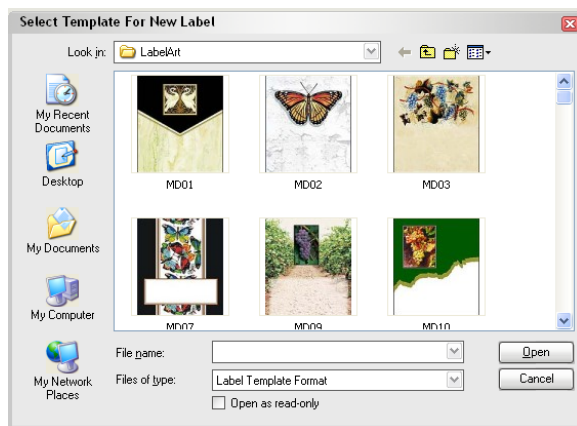

Place beside printer
For easy reference

1. Open the program, double click on the icon on your desktop

2. Click  the **Create Label** icon to select a MacDay label template.

3. Select the label template by scrolling through the list to find the image of the template you want OR type the label code by File name. Click Open or press “Enter” key. The template opens, ready for editing.

4. Select a view – Click on “**View**” at the top of the screen and then click on “**Page**” from the drop-down list to optimize your view.

TIP: Hover at each icon to learn how to use it

5. Double click on the text box you wish to edit. A screen appears over the text that will be deleted when you start to type. Once you have entered your text, click anywhere on the label background and sizing handles will appear around the text. You can now customize your text by selecting a font style, resize your text, move, or rotate it.
6. Click on the wine name to edit, and use the drop down list to choose the wine name you need. If it is not in the list, double click to edit the box and type in the new wine name. You can add it to the drop down list or choose NO when the message appears.
7. Double click on the bottling date to edit.

8. Click on Printer icon  to open Print Preview window, click on the Printer icon  and select the number of labels to print. Click **Print**
